France
7th January 2010

Dear Sir or Madam,

Re: 12-week work placement

I'm in the third year on five of apprentice engineering studies at ICAM Bretagne, Vannes, France. I am doing a degree in production engineering. With the apprenticeship, I work one week at school to learn engineering sciences, and the week after I work in a company, Enseigne Techni Gravure (ETG), which makes shop signs. In this company I am responsible for the stock organization and production improvement. I also work on a project to make ecological signs.

As part of my studies, and because I really want to meet the world, I will carry out a 12 week work placement in an English speaking environment from mid-May to mid-August 2010. I would like to apply to your company, because I think that your organisation could show me your culture both work and after working. If you need a French coffee maker, I'm here for you!

I really hope to live my future life far from France, in a country with the mentality I enjoy, and I have the will power to succeed. The sport I did, gave me the culture never to forget.

Please find appended below my Curriculum Vitae which will give you full details concerning my background and qualifications.

I look forward to hearing from you.

Yours sincerely,

Mr Marc CHENE

DOB 06/30/1989 (20 y-o)
French, Single

I'm looking for a 12 week work experience to discover your culture and share my knowledge.

Personal information

- From October 2009 to October 2012: Apprentice production engineer in a shop sign maker company, ETG. I have to organize all the stock, improve the production capacity, and after, I'll work on a new plan for an ecological sign.
 - Summer 2008: 10 week work experience in CROWNCORK S.A., the world leader in metal box production.
 - Summers 2009 and 2006: Summer job as stevedore in a demolition yard.
 - Summer 2007: waiter in the Chambord Castle snack bar
-

Education

- From October 2009 to October 2012: Preparing an Engineering apprenticeship Master of production at the ICAM Bretagne Engineering School.
 - From September 2007 to June 2009: Diploma of Engineer at the ICAM Bretagne Engineering School.
 - June 2007: BAC (A level) with honours (mention bien).
-

After school activities

- Full, clean French driving license
 - Mother tongue: French; Quite good level in English; Spanish basic
 - Computer skills: Word, Excel, Power Point, VBA, Solidworks
 - Rowing for 5 years (national level)
 - Fond of water sports like surf/skiing/sailing – really interested in surfboard shaping
-
